

Forms of Linear Equations Practice

Convert each equation into the two other forms and graph. Show your work!

Note: Be strategic with what you choose to do first. Some conversions are easier than others!

Slope-Intercept Form	Point-Slope Form	Standard Form	Graph
$y = \frac{1}{2}x - 3$			
	$y - 2 = -\frac{1}{2}(x + 4)$		
		$3x - 2y = 8$	

			
	$y + 5 = -2(x - 3)$		
$y = 3x - 2$			
		$x + 3y = -3$
